

# Understanding the Financial Crisis: Did Mathematical Models Fail?

## Notes on Speakers and other Contributors

**Brian J. Coffey** is currently with Merrill Lynch Preventative Risk Management. He has been a strategist for Global Foreign Exchange at Merrill Lynch where he oversaw currency trading. He has also served as Head of Merrill's Debt Analytics and as a member of Merrill's Quantitative Risk Management Group. Prior to joining Merrill, he was Head of Quantitative Development at Rabobank International and before that a Currency Option Strategist at Goldman Sachs International in London.

**Gregory Connor**, Ph.D (Yale), Professor of Finance, NUI, Maynooth. Prior to that he was Professor of Finance, LSE and Director of the Asset Pricing and Portfolio Management Programme, Financial Markets Group, LSE. Research interests: factor modelling of asset returns, multifactor pricing models, portfolio management.

**Colm Fitzgerald (DCU)** is an Adjunct Lecturer in Financial & Actuarial Mathematics in Dublin City University. He has been developing and using financial mathematical models for trading purposes for the last 17 years and was previously Head of Quantitative Trading in Bank of Ireland Global Markets. He holds an MA in Economics and is a qualified Actuary. He is an external consultant to Rosenblatt Securities and a founding director of Paragon Research Ltd.

**Pramit Ghose** graduated from TCD in Mathematics. He is a qualified actuary and is currently Managing Partner and Head of Investment Strategy of Bloxham.

**Patrick Honohan**, Ph.D (LSE) Professor of International Financial Economics and Development, TCD. Before that he was Senior Advisor, Financial Sector Policy for the World Bank, Washington DC. Research interests include financial regulation and the prevention and consequences of banking crisis.

**David Kingston** graduated from Oxford University in 1964, majoring in Mathematics and qualified as a Fellow of the Faculty of Actuaries in 1967. He joined Irish Life in 1968, having worked in pensions and investment with Scottish Widows. He now spends his time advising on investment, insurance and pensions, mainly as a director. David is a founding director and Chairman of Acuvest.

**Peter Richmond** is Chair of an EU network and is also a visiting professor in TCD and has an association with CASL (Complex and Adaptive Systems Laboratory, UCD). His research interests are in applying physics to understand financial risks.

**Shane Whelan**, Ph.D (Heriot-Watt) Department of Statistics, UCD School of Mathematical Sciences. Prior to that he was a successful fund manager for Friends First. He is a qualified Actuary and does actuarial consultancy work. His research interests include Pension Provisions in Ireland for the 21<sup>st</sup> century.
